A VISION OF CONSENSUS AND CARE

Digital Community. Human Connection.

GAEB · GUAN AI COIN

Where community participation meets the possibilities of blockchain and the enduring needs of global charity. A long-term framework for collaborative digital infrastructure, responsible action and shared progress.

BSC / BEP-20 | GLOBAL CHARITY | COMMUNITY-DRIVEN

PROJECT OVERVIEW / CONTENTS

A shared vision, a structured path.

The foundation of GAEB and the principles guiding its proposed development.

ABOUT THE PROJECT

GAEB Guan Ai Coin

GAEB is a community-oriented digital asset on BNB Smart Chain, bringing together the openness of blockchain networks, participatory community coordination and a vision for global public benefit. The project is introduced as an initiative originating from the Satoshi Tribe and supported by members of a CZ-supporter community.

The ambition extends beyond token transfers: GAEB seeks to foster a network where shared interests become organized collaboration, and where participation can eventually support education, community services, practical aid and transparent public-benefit initiatives.

THE GAEB FRAMEWORK

Digital asset infrastructure provides a common reference point; community participation shapes priorities; charitable and educational initiatives are intended to connect collective resources with real-world needs.

01 / PREFACE

From shared belief to shared consensus.

The meaning of a community lies in the connections it builds and the actions it sustains.

GAEB begins with a simple proposition: digital networks can connect people and resources across geographic boundaries, while a shared mission can transform participation into collective capability. Blockchain infrastructure supports public records and open interactions; the lasting value of an ecosystem, however, grows through practical cooperation, credible communication and continued engagement.

At the outset, we centered our vision on 210 portions representing 2,100 trillion, advancing from shared trust toward shared consensus. Through 47 rounds of individually distributed and interconnected expansion, each comprising 210 billion, the goal is to extend this consensus network toward the Binance spot market. Each market pullback and corresponding ecosystem feedback is envisioned as an opportunity for deeper charitable expansion.

> **“From shared belief to shared consensus. Every renewal of the ecosystem can become an opportunity to extend the reach of care.”**

The broader direction combines four mutually reinforcing priorities: consensus-building, accessible digital participation, charitable coordination and transparent community processes. Together, they describe a pathway from an idea to a network of participants capable of organizing projects, evaluating needs and communicating measurable outcomes.

210	47	CARE
Foundational narrative units	Conceptual expansion stages	A central ecosystem purpose

Growth is intended to be measured not only through community reach, but also through the quality of coordination, ecosystem participation and the ability to support meaningful initiatives over time.

02 / PROJECT IDENTITY

A digital asset with a human purpose.

A distinct BSC token built around community connection, long-term participation and social impact.

FULL TOKEN NAME

GAEB Guan Ai Coin

Project: GAEB

TOKEN SYMBOL

GAEB

Network: BNB Smart Chain / BEP-20

TOKEN CONTRACT / BNB SMART CHAIN

0x70e4a76b346504a729ee7e1dec888c578d888888

GAEB positions itself as a community-oriented asset designed to encourage communication, responsible digital participation and coordinated social-purpose initiatives. Inspired by the openness and global accessibility associated with Bitcoin, it uses the EVM-compatible BNB Smart Chain ecosystem to create a practical foundation for wallets, transactions and community tools.

The project's “low-cost BTC concept” refers to an aspiration for broad accessibility and participatory network culture. GAEB is a separate BSC-issued token rather than native Bitcoin, and its economics, infrastructure and governance are its own.

◎

Open Participation

Encouraging community dialogue and more accessible digital-asset knowledge.

◈

Long-Term Building

Organizing continuous effort into lasting community capabilities.

✦

Public-Benefit Vision

Exploring education, community wellbeing and inclusion.

03 / NETWORK & TECHNOLOGY

Infrastructure for open coordination.

Blockchain records, community participation and charitable initiatives in a single ecosystem architecture.

GAEB operates on BNB Smart Chain, an EVM-compatible blockchain environment supporting standard wallets, token interactions, block explorers and decentralized exchanges. Using existing network infrastructure allows ecosystem development to focus on accessible participation, community communication and the planning of practical initiatives.

01 / NETWORK

BSC

Token and transaction infrastructure

02 / INTERFACE

BEP-20

Wallet-compatible token interactions

03 / COMMUNITY

Web3

Open access to digital coordination

THREE CONNECTED LAYERS

TOKEN
Record · Transfer · Query

→

COMMUNITY
Learn · Connect · Build

→

IMPACT
Propose · Act · Report

The token layer provides a common digital reference. The community layer enables discussion, participation and collective planning. The impact layer focuses on proposed charitable programs, project coordination and outcome reporting.

01 **Accessibility**

Clear wallet guidance and understandable network information help members participate with confidence.

02 **Traceability**

Public-chain records can support review of asset movements and documented program activity.

03 **Coordination**

Open communication channels connect regional teams, project proposals and progress updates.

04 / TOKEN ECONOMICS

Tokenomics and allocation.

A fixed-supply structure organized around charitable resources and ecosystem development.

TOTAL TOKEN SUPPLY

2,100,000,000,000,000,000

GAEB · Total supply

- Charity Foundation Pool — 90.48%
- Founder & Geek Rewards — 8.023%
- Token Burn Allocation — 0.904%
- Exchange Development Reserve — 0.593%

Allocation	Share	GAEB Tokens
Charity Foundation Pool	**90.48%**	1,900,080,000,000,000,000
Founder & Geek Rewards	**8.023%**	168,483,000,000,000,000
Token Burn	**0.904%**	18,984,000,000,000,000
Exchange Development	**0.593%**	12,453,000,000,000,000

The four allocations total exactly 100% of the stated supply. Their intended roles are charity-focused resources, contributor recognition, burn allocation and future market infrastructure.

04 / ALLOCATION & ADDRESSES

Allocation purposes and designated addresses.

Separating charitable resources, contribution incentives and long-term market development.

90.48% / CHARITY FOUNDATION POOL

A primary resource base for public-benefit initiatives

This allocation is designated for the long-term charity and ecosystem vision. Potential uses include project coordination, education-focused activity, local community partnerships and other eligible programs with documented objectives.

0x1b9a497877cd302606fb2c46af3bf390ac96a3a8

8.023% / FOUNDER & GEEK REWARDS

Recognizing foundational technical and community work

The reward allocation is intended to support early contributors across technology, product design, content, communications and community organization, aligned with documented contribution and development milestones.

0xeecf5920e3edd8aab4cec121eb9b8e7443ab7777

0.904% / TOKEN BURN

A designated burn allocation directed to a conventional inaccessible burn address.

0x000000000000000000000000000000000000dead

0.593% / EXCHANGE RESERVE

An allocation for potential exchange-related infrastructure, technical coordination and market-development activities.

Dedicated future market-development resources.

A structured allocation process can incorporate documented purposes, budget oversight, on-chain execution records and periodic communication with the community.

05 / CONSENSUS EXPANSION

Building consensus through participation.

Connecting the founding narrative to a broader, organized community network.

GAEB's early consensus narrative refers to 210 units and 2,100 trillion, with 47 conceptual stages of 210 billion each. These figures articulate a staged community expansion concept and are distinct from the fixed total supply of GAEB stated in the tokenomics section.

The purpose of an expansion framework is to connect brand awareness with long-term participation: educating new members, fostering local community leadership, gathering charitable proposals and establishing shared standards for coordination.

01 - 12
Awareness, communication and learning

13 - 24
Volunteer networks and proposals

25 - 36
Charity concepts and field coordination

37 - 47
Regional partnerships and transparency

THE DEVELOPMENT PRINCIPLE

Progress is more than market activity.

The founding vision describes each market pullback as an opportunity to deepen the charity mission. In practical ecosystem terms, the principle is to maintain dialogue around public-benefit priorities through changing market cycles, with clear proposals, transparent resource management and sustained community relationships.

> Long-term consensus depends on credible information and meaningful participation. The development path therefore connects communication goals with organizational capacity and the ability to produce useful outcomes.

06 / ECOSYSTEM APPLICATIONS

An ecosystem shaped by real needs.

Education, community development and public-benefit coordination as complementary directions.

Global Giving Networks

Exploring transparent channels for communities to discover charitable needs, organize support and communicate the progress of approved programs.

Digital Skills and Education

Improving access to basic Web3 knowledge, safe wallet use, digital literacy and skill-building opportunities for emerging communities.

Community Participation

Enabling ideas and feedback from diverse geographic regions to contribute to shared priorities and longer-term development programs.

Inclusive Digital Coordination

Connecting volunteers, organizers and community partners through consistent reporting, project documentation and accessible information.

FROM IDEAS TO ACTION

DISCOVER
Identify Needs
Listen to communities and document priorities.

DESIGN
Plan Activity
Define objectives, resources and responsibilities.

DELIVER
Report Impact
Track milestones, expenses and outcomes.

> **The strongest digital communities grow when shared participation becomes shared capability.**

06 / DAPP ECOSYSTEM

Golden Founder Mining & GAEB Staking.

Mining machines, fixed-term token staking and community referral rewards.

1 BNB	2100	329 DAYS
PRICE PER FOUNDER MINER	TOTAL FOUNDER MINERS	MINING REWARD PERIOD

01 / GOLDEN FOUNDER MINING

10 Trillion GAEB · Mining Reward Allocation

Each Golden Founder mining machine is available for **1 BNB**, with a total allocation of **2100 machines**. The total mining reward allocation is **10 trillion GAEB**, designed to be distributed evenly across **329 days**.

02 / GAEB TOKEN STAKING

Four Fixed-Term Staking Options

1 MONTH	3 MONTHS	6 MONTHS	12 MONTHS
10%	15%	20%	30%
MONTHLY RATE	MONTHLY RATE	MONTHLY RATE	MONTHLY RATE

Participants may stake GAEB tokens for their selected period. The percentages above describe the configured monthly reward rates for each staking term.

03 / COMMUNITY REFERRAL REWARDS

GAEB Staking Referral

When a referred user stakes GAEB, the referrer receives **10% of the GAEB amount staked** as a referral reward.

BNB Mining Machine Referral

When a referred user purchases a miner using BNB, the referrer receives a fixed reward of **70 billion GAEB**.

> Referral rewards are designed for real-time distribution under the DApp rules. Access: https://dapp.gaeb.top/

07 / AFRICA & GLOBAL CHARITY

Africa: opportunity through community care.

Building a locally informed vision for education, wellbeing and social participation.

Africa represents an important region within GAEB's long-term public-benefit vision. Across diverse countries and communities, the project sees opportunities to support initiatives shaped by local knowledge and practical needs: youth education, digital access, basic community services, clean water awareness and pathways to opportunity.

Scenes of meetings and community exchange, included as editorial context for the project's Africa-focused charitable vision.

Education and Digital Skills

Community learning, practical technology access, mentorship and basic digital confidence.

Health and Community Wellbeing

Exploring partnerships focused on essential information, outreach and local wellbeing needs.

Clean Water and Basic Resources

Supporting conversations around accessible everyday resources and locally identified priorities.

Opportunity and Local Leadership

Encouraging initiatives designed with local voices, volunteers and accountable project teams.

> The GAEB approach places local insight, respectful collaboration and clear reporting at the center of the proposed charity ecosystem. Regional priorities are intended to be shaped through consultation rather than assumptions.

08 / COMMUNITY & COORDINATION

Participation as long-term infrastructure.

Turning openness, shared learning and community dialogue into organized cooperation.

A lasting decentralized community requires more than communication channels. It needs a consistent identity, responsible moderation, accessible project information and opportunities for meaningful contribution. GAEB's model therefore emphasizes community education alongside coordination around social-purpose activities.

OPEN COMMUNICATION

Community Channels

Keeping discussions active, publishing clear updates and supporting contributors across multiple regions.

SHARED KNOWLEDGE

Digital Literacy

Helping participants understand wallet practices, transaction records, token economics and community processes.

COLLECTIVE DEVELOPMENT

Ideas and Proposals

Creating pathways for ideas to be submitted, discussed, reviewed and advanced into concrete activities.

CLEAR RESPONSIBILITY

Progress Reporting

Encouraging consistent records of goals, timelines, responsible parties and project milestones.

COMMUNITY VALUES

TRUST
Clarity
Consistent information and accessible updates.

ACTION
Contribution
Participation tied to identifiable activities.

IMPACT
Accountability
Practical follow-through and open progress.

> **A community is strongest when its members share both an ambition and a responsibility.**

09 / HOLDER FEEDBACK

Holder ecosystem feedback framework.

A two-tier participation concept centered on the proposed 30-day holding cycle.

HOLDING FEEDBACK STRUCTURE

To encourage ongoing participation in the GAEB ecosystem, the project describes a minimum recognition framework linked to purchase size, holding period and a designated feedback address.

TIER 01 / 200 USDT

200 USDT

Acquire GAEB and hold for 30 days

Transfer 2 GAEB

The stated recognition standard references GAEB valued at 20 USDT.

TIER 02 / 300 USDT

300 USDT

Acquire GAEB and hold for 30 days

Transfer 3 GAEB

The stated recognition standard references GAEB valued at 30 USDT.

DESIGNATED FEEDBACK ADDRESS

0x09B2D97C14a2e1a0c8355d2c3D9f545B61687666

Following the proposed holding period, participants in each tier transfer the corresponding number of GAEB tokens to the designated address. On-chain transaction records provide a reference for participation and any subsequent recognition process.

> **“No upper participation limit. Continued holding. Recurring ecosystem feedback.”**

A THREE-STAGE MODEL

01 / ACQUIRE
Buy GAEB
At the 200 or 300 USDT tier.

02 / HOLD
30-Day Period
Maintain the relevant holdings.

03 / RECORD
Tier Feedback
Record the applicable token transfer.

10 / FEEDBACK MANAGEMENT

A framework for transparent coordination.

Connecting time-based participation with clear records and community processes.

The proposed holder feedback structure relies on three information categories: purchase tier, continued holding period and the movement of the specified number of GAEB tokens to the feedback address. These categories can serve as a foundation for consistent recordkeeping and community communications.

01 / HOLD
Period Data
Define the basis for measuring the 30-day interval.

02 / RECORD
On-Chain Evidence
Associate a wallet, timestamp and transaction.

03 / MANAGE
Program Tracking
Organize recognition records and periodic reports.

MANAGEMENT PRIORITIES

A **Tier-Based Eligibility**
Keep the 200 USDT and 300 USDT participation categories consistent across official materials, including the reference value of 30 USDT in GAEB.

B **Cycle Coordination**
Define and maintain a repeatable approach to recording holding periods, participation rounds and program information.

C **Asset and Address Records**
Document the designated feedback wallet and relevant BSC transactions through an accessible information process.

D **Ecosystem Resource Planning**
Link program administration with budgeting, records of implementation and periodic community reporting.

LONG-TERM ALIGNMENT

Community participation meets public purpose.

The broader ambition is to connect an active community with practical ecosystem programs, so that continued engagement also contributes to collaborative learning, transparent communication and shared development priorities.

11 / ROADMAP & EXCHANGE VISION

From community foundations to global reach.

A phased roadmap for engagement, ecosystem cooperation and market-development aspirations.

PHASE 01 / FOUNDATION

Identity and Access

Establish the GAEB project identity, multilingual information architecture, social channels and token discovery resources on BNB Smart Chain.

PHASE 02 / PARTICIPATION

Community Network

Expand community knowledge, regional communication and participation pathways, supported by accessible and consistent updates.

PHASE 03 / PUBLIC BENEFIT

Charity Ecosystem

Identify local priorities and explore implementation frameworks for education, digital access and community-support proposals.

PHASE 04 / MARKET VISION

Global Exchange Ambitions

Develop the project ecosystem and pursue appropriate market opportunities, including the long-term goals outlined below.

FUTURE TARGET / BINANCE ALPHA

Binance Alpha

A proposed future discovery and ecosystem exposure objective, dependent on separate platform evaluation and eligibility.

LONG-TERM TARGET / BINANCE SPOT

Binance Spot

A longer-term market-development aspiration to be pursued through sustained project maturity and the exchange's independent review.

> The roadmap is a statement of intended development direction. Any exchange listing requires the platform's own approval and is not established by an internal project target.

12 / DEVELOPMENT & REFERENCES

Evaluating progress through real outcomes.

Community effectiveness, public-benefit activity and accountable project communication.

GAEB proposes to view long-term development through a combination of infrastructure maturity, community capability, charitable coordination and accessible information. These indicators offer a more substantial basis for ecosystem assessment than market metrics alone.

Reliable Information

Consistent project identity, documented contracts, accessible records and regular community communication.

Active Community

Constructive participation, regional engagement, educational content and coordinated volunteer activity.

Practical Charity Initiatives

Projects with clear local needs, defined objectives, responsible participants and tangible follow-through.

Long-Term Cooperation

Partnership exploration, sustainable administration and a structured approach to recurring development needs.

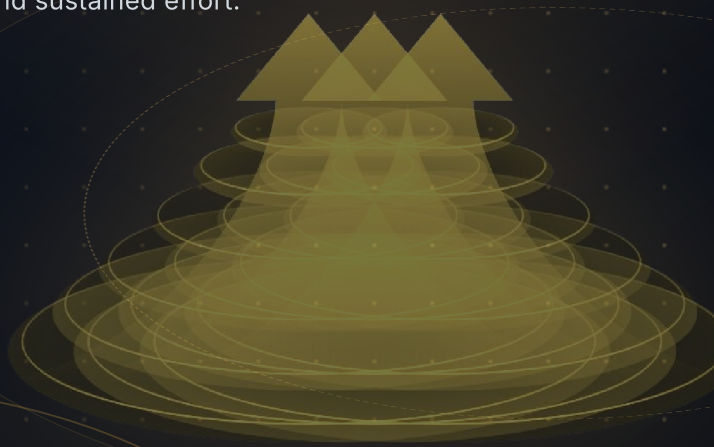
> GAEB's strategic objective is to strengthen the relationship between digital community participation and purposeful social action through open, organized and long-term ecosystem development.

FINAL VISION

Shared purpose.
Care beyond borders.

GAEB is conceived as a bridge between digital infrastructure and human aspiration. Its mission is to cultivate a community capable of learning together, coordinating responsibly and developing initiatives that address real needs.

From a token on BNB Smart Chain to an increasingly connected global community, and from an Africa-focused charitable vision to broader potential collaborations, the intended journey is one of participation, communication and sustained effort.



> **ONE COMMUNITY.**
> **ONE SHARED PURPOSE.**
> **CARE BEYOND BORDERS.**
